Inspect Your Home

This workshop will cover the importance of conducting an annual inspection of your home. Weather, insects, rodents and even residents may cause damage to a home. Some damage may not even be noticeable. Using an inspection template, completing this tool will help you assess the damage, presence of insects/mice, damage, wear and tear. The usefulness of conducting an inspection will be covered and the next steps following your inspection will be discussed.

Dates: October 6th and 20th       Attend one session only
Time: 6:00 – 8:00 p.m.
Location: Seneca Training Center   10189 Old Rte 17, Steamburg

Household Energy Saving Steps

This workshop will cover the many ways a home can lose energy and costs you more in energy expenses. Extreme changes in the weather affects the house. Learn how the weather does this and the steps you can take to lower the impact. This workshop can be a second step to the home inspection workshop. Types of energy efficient lighting will also be covered.

Dates: November 3rd and 17th
Time: 6 – 8:00 p.m.       Attend one session only
Location: Seneca Training Center   10189 Old Rte 17, Steamburg

Tools for the Home

Learn what every homeowner should have on hand to handle little fixes. Also learn about specialty tools for bigger jobs that you can rent locally to save yourself from buying equipment and using it once. The purpose and use of tools will be covered and some practical demonstrations.
