

GENEALOGY

What is it? Genealogy also known as *family history*, is the study of families and the tracing of their lineages and history. Genealogists use oral interviews, historical records, genetic analysis, and other records to obtain information about a family and to demonstrate kinship and pedigrees of its members. The results are often displayed in charts or written as narratives.

Do you want to know how to start your own *Family Tree*? Join us at the Seneca Nation Library - Cattaraugus Territory where **Mr. Jack Ericson (SUNY Fredonia)** will explain how.

Wednesday April 1, 2015

6 - 8pm

Seneca Nation Library
